LAPORAN PRAKTIKUM PEMROGRAMAN WEB 1 JQUERY MODUL 6

Disusun oleh:

Nama : Risma Okviandie Permana

NIM : 20230810067

Kelas : TINFC-2023-05

Program Studi : Teknik Informatika

Dosen Pengampu : Yati Nurhayati, M.Kom

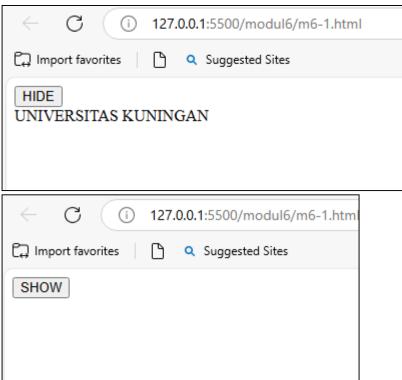

PROGRAM STUDI TEKNIK INFORMATIKA FAKULTAS ILMU KOMPUTER UNIVERSITAS KUNINGAN 2024

PRAKTIUM

1. Praktikum 1:

Source code:

```
modul6 > 5 m6-1.html > ♦ html > ♦ body > ♦ div.uniku
      <!DOCTYPE html>
  2
      <html lang="en">
  3
      <head>
          <meta charset="UTF-8">
  4
  5
           <meta name="viewport" content="width=device-width, initial-scale=1.0">
  6
          <title>jQuery</title>
          <script src="Js/jquery-3.7.1.js"></script>
  7
  8
           <script>
               $(document).ready(function(){
  9
                   $(".tampil").hide();
 10
                   $(".sembunyi").click(function(){
 11
                       $(".uniku").hide("slow");
 12
 13
                       $(".tampil").show();
 14
                       $(".sembunyi").hide();
 15
 16
                   });
 17
                   $(".tampil").click(function(){
                       $(".uniku").show("slow");
 18
                       $(".sembunyi").show();
 19
                       $(".tampil").hide();
 20
 21
                   });
 22
               })
 23
           </script>
     </head>
 24
 25
      <body>
 26
           <button class="sembunyi">HIDE</button>
           <button class="tampil">SHOW</button>
 27
           <div class="uniku">UNIVERSITAS KUNINGAN</div>
 28
 29
      </body>
 30
      </html>
```

Analisis:

Halaman HTML diatas menerepkan Jquery untuk menyembunyikan tulisan, ketika tombol hide ditekan tulisan "UNIVERSITAS KUNINGAN" akan hilang dan jika klik show akan muncul kembali

2. Praktikum 2

Source code:

```
<!DOCTYPE html>
    <html lang="en">
 3
    <head>
 4
        <meta charset="UTF-8">
        <meta name="viewport" content="width=device-width, initial-scale=1.0">
 5
        <title>jQuery</title>
        <script src="JS/jquery-3.7.1.js"></script>
 8
        <script>
            $(document).ready(function(){
 9
                $(".fadeout").click(function(){
10
                    $("img").fadeOut();
11
                });
12
                $(".fadein").click(function(){
13
                   $("img").fadeIn();
14
15
                });
                $(".fadetoggle").click(function(){
16
17
                    $("img").fadeToggle();
18
                    $("img").css("background-color", "orange");
19
                });
20
                $(".fadeto").click(function(){
                    $("img").fadeTo("slow", 0.5);
21
                    $("img") css("background-color", "lightpink");
22
23
24
            })
25
         </script>
    </head>
26
27
28
        <button class="fadeout" style="background-color: \( \square\) #add8e6;">Fade Out</button>
         <button class="fadein" style="background-color: ■#00bfff;">Fade In</button>
29
        <button class="fadetoggle" style="background-color: ■#ffa500;">Fade Toggle</button>
30
        31
32
33
        <img src="Logo_Uniku.jpg" alt="logo uniku">
     </body>
34
35
     </html>
```

Hasil:

Analisis:

Web diatas menampilkan 4 tombol dan gambar logo, tombol fade out berfungsi agar gambar menghilang perlahan, tombol fade in berfungsi agar gambar muncul perlahan, tombol fade toggle bisa memunculkan gambar maupun menghilangkan gambar, tombol fade to berfungsi agar gambar menjadi transparan.

3. Praktikum 3

Source code html:

```
<!DOCTYPE html>
     <html lang="en">
     <head>
        <meta charset="UTF-8">
        <meta name="viewport" content="width=device-width, initial-scale=1.0">
        <title>jQuery</title>
        <script src="JS/jquery-3.7.1.js"></script>
 8
        <style>
9
            .tab{
10
                display: none;
11
12
            .tab-button{
              cursor: pointer;
14
                padding: 10px;
                background-color: □#f1f1f1;
15
16
                border: 1px solid #ccc;
17
               display: inline-block;
18
19
            background-color: □#ccc;
21
        </style>
22
    </head>
23
24
     <body>
25
        <h1>Tugas Web Developer</h1>
26
           <button class="tab-button active" data-tab="tab1">Tab1</button>
27
            <button class="tab-button" data-tab="tab2">Tab2</button>
28
            <button class="tab-button" data-tab="tab3">Tab3</button>
29
30
        </div>
        <div id="tab1" class="tab" style="display: block;">
31
32
           <h2>Front-End Developer</h2>
33
             Mengutamakan Fungsi Aplikasi berdasarkan User Interface
        </div>
35
        <div id="tab2" class="tab">
           <h2>Back-End Development</h2>
36
37
            Berjalan di sisi server dengan mengelola data menjadi informasi dari database
38
        </div>
39
        <div id="tab3" class="tab">
            <h2>Full-Stack Development</h2>
            Memiliki kemampuan dikedua sisi, yaitu Front-End dan Back-End, sehingga dapat menangani
                semua aspek pengembangan web
42
```

```
<script>
45
              $(document).ready(function(){
                  $(".tab-button").click(function(){
46
                      $(".tab").hide();
47
48
                      $(".tab-button").removeClass("active");
49
50
51
                      $(this).addClass("active");
                      var tabToShow = $(this).data("tab");
52
                      $("#" + tabToShow).show();
53
54
                  });
55
              });
56
          </script>
57
     </body>
58
     </html>
59
```

Analisis:

Web diatas menampilkan tiga tab, setiap tab akan memunculkan konten yang berbeda ketika diklik.

4. Praktikum 4

Source code:

```
<!DOCTYPE html>
   <html lang="en">
3 <head>
         <meta charset="UTF-8">
         <meta name="viewport" content="width=device-width, initial-scale=1.0">
6
         <title>Pie Chart dan Bar Chart</title>
         <script src="js/chart.js"></script>
         <script src="js/jquery-3.7.1.js"></script>
         <style>
10
             body {
                display: flex;
11
                align-items: center;
12
                height: 100vh;
13
             }#myPieChart {
    max-width: 300px;
14
15
16
                 height: 100px;
17
         </style>
18
    </head>
19
20 <body>
         <h1>Data Tingkat Pendidikan Masyarakat (dalam%)</h1>
21
         <h2>Tahun 2024</h2>
         <canvas id="myPieChart" width="300" height="300"></canvas>
23
24
         <script>
25
             $(document).ready(function(){
26
                 pieData = {
                     labels: ["SD", "SMP", "SMA"],
                     datasets: [
                             data: [50, 30, 20],
                             backgroundColor: ["#FF6384", "#36A2EB", "#FFCE56"],
31
32
                         },
                     ],
33
34
35
                 ctxPie = document.getElementById("myPieChart").getContext("2d");
36
                 myPieChart = new Chart(ctxPie, {
                    type: "pie",
37
38
                     data: pieData,
39
                     options: {
40
                         responsive: true,
41
                         maintainAspectRatio: false
42
43
44
             });
         </script>
     </body>
```

Analisis:

Web di atas menampilakan diagram pie, berdasarkan presentase yang sudah diatur.

5. Praktikum 5

source code:

```
4:DOCTYPE html>
cotml lang="en">
           cmeta charset."UTF-8">
           cmeta name-"vieuport" content="width-device-width, initial-scale=1.0">
           ctitle:Akses kamera dengan lQueryc/title:
cscript src="15/jquery-3.7.1.js">c/script>
      cvideo id="video" width="640" height="480px" autoplay></video>
cbutton id="start">Pulai Kamera</putton>
           (button id="stop">Hentiken Kamera:/button>
           escripts
               $(document).ready(function(){
                   const video = document.getElementById("video");
let mediaStream;
                    $("Estart").click(function(){
                         mavigator, mediaDevices
                             .getinerMedia((video: true))
.then(function(stream)(
    mediaStream = stream;
                                  video.srcObject - strmm;
                              ,catcb(function(err)(
   console.error("Gegel mengakses keneral " + err);
                     1)1
                     $("#stop"),click(function(){
                        if(mediaStream)(
                             mediaStream.getTracks().forEach((track) => track.stop());
                     3);
                171
           (/script)
      (/bady)
      c/html>
```

Analisis:

JQuery memungkinkan web dapat mengaskses kamera, pada web di atas ketika mengklik "Mulai Kamera" web akan mengambil gambar dari kamera dan untuk menghentikan, klik "Hentikan Kamera".

6. Praktikum 6

Source Code:

```
<!DOCTYPE html>
 2
     <html lang="en">
 3
     <head>
         <meta charset="UTF-8">
 4
         <meta name="viewport" content="width=device-width, initial-scale=1.0">
 5
 6
         <title>Manipulasi DOM dengan JQuery</title>
 7
         <script src="js/jquery-3.7.1.js"></script>
 8
     </head>
 9
     <body>
         <h1>Manipulasi DOM dengan JQuery</h1>
10
         <button id="tambah">Tambah Data</button>
11
         <button id="ubah">Ubah Data</button>
12
13
         <button id="hapus">Hapus Data</button>
14
         <div id="output">
15
              <div class="item">Data 1</div>
              <div class="item">Data 2</div>
             <div class="item">Data 3</div>
17
         </div>
18
19
          <script>
              $(document).ready(function(){
20
                 $("#tambah").on("click", function(){
21
                      $("#output").append('<div class="item"> Data Baru</div>');
22
23
24
                 $("#ubah").on("click", function(){
25
                      $("#output .item:first").text("Data Pertama Diubah");
26
                 });
27
                 $("#hapus").on("click", function(){
28
                      $("#output .item:last").remove();
                 });
30
             });
31
          </script>
     </body>
33
     </html>
```

Hasil:

Tambah data:

Ubah data:

Hapus data:

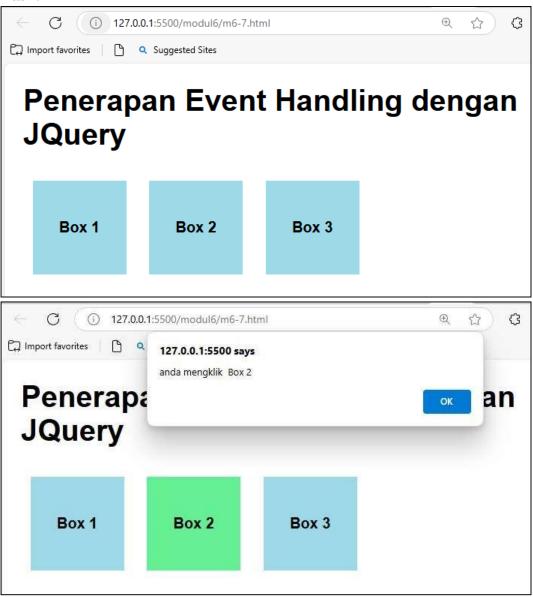

Analisis:

Web di atas menerapkan JQuery untuk memanipulasi DOM, web diatas memiliki tiga tombol yang berfungsi untuk , menambah data, mengubah data, dan menghapus data.

7. Praktikum 7

Source Code:

```
<!DOCTYPE html>
    <html lang="en">
3
     <head>
         <meta charset="UTF-8">
4
        <meta name="viewport" content="width=device-width, initial-scale=1.0">
        <title>Penerapan Event Handling dengan jQuery</title>
6
7
        <script src="js/jquery-3.7.1.js"></script>
        <style>
8
9
             body{
                 font-family: Arial, sans-serif;
10
11
                 margin: 20px;
12
13
             .box{
14
                width: 100px;
15
                 height: 100px;
                background-color: □lightblue;
16
17
                margin: 10px;
18
                display: inline-block;
                 text-align: center;
19
                line-height: 100px;
20
21
                 font-weight: bold;
22
                 cursor: pointer;
                 transition: background-color 0.3s;
23
24
25
         </style>
26
     </head>
27
    <body>
28
        <h1>Penerapan Event Handling dengan JQuery</h1>
29
30
        <div class="box" id="box1"> Box 1</div>
       <div class="box" id="box2"> Box 2</div>
31
        <div class="box" id="box3"> Box 3</div>
32
33
        <script>
34
             $(document).ready(function(){
35
                 $(".box").on("click", function(){
                    $(this).toggleClass("active");
36
37
                    alert(`anda mengklik ${$(this).text()}`);
38
                 });
                 $(".box").on("mouseenter", function(){
39
40
                    $(this).css("background-color", "lightgreen");
41
42
                 $(".box").on("mouseleave", function(){
43
                     $(this).css("background-color", "lightblue");
44
                 });
45
             });
46
         </script>
47
     </body>
48
     </html>
```

Analsisis:

Web di atas menampilkan tiga box yang dapat diklik, dengan menggunakan Jquery box dapat berubah warna ketika kursor diarahkan box, ketika box diklik web akan memberikan pesan box nomor berapa yang sudah diklik.

TUGAS

1. Buat perhitungan untuk form pemesanan menggunakan JQuery:

Source code:

```
<!DOCTYPE html>
     <html lang="id">
     khead>
         <meta charset="UTF-8">
          cmeta name="viewport" content="width=device-width, initial-scale=1.0">
          <title>Form Pemesanan</title>
         k rel="stylesheet" href="../modul3/m3-tugas1.css">
         <script src="JS/jquery-3.7.1.js"></script>
         «script»
10
             $(document).ready(function () {
11
                  const hargaKamar = {
                      "STANDAR": 388888,
12
                      "DELUXE": 500000,
13
                      "FAMILY": 800000
14
15
                  $("#tipe_kamar, #durasi_menginap, #breakfast").on("change", function () {
                      const tipeKamar = $("#tipe_kamar").val();
17
18
                      const durasiMenginap = parseInt($("#durasi_menginap").val()) || 0;
19
                      const includeBreakfast = $("#breakfast").is(":checked");
29
                      let hargaPerHari = hargaKamar[tipeKamar] || 0;
21
22
                      $("#harga").val(hargaPerHari.toLocaleString("id-ID"));
23
24
                      let totalBayar = hargaPerHari * durasiMenginap;
25
                      let diskon = 0;
25
                      if (durasiMenginap > 3) {
    diskon = totalBayar * 0.1;
27
28
29
                          totalBayar -= diskon;
38
31
32
                      if (includeBreakfast) {
                          totalBayar += 80000 * durasiMenginap;
33
34
35
                      $("#total_bayar").val(totalBayar.toLocaleString("id-ID"));
36
37
```

```
$("form").on("submit", function (event) {
   event.preventDefault();
38
39
